EDUCATION

California State University, Fullerton

B.S. in Computer Science, Minor in Mathematics

Aug 2022 – May 2026

GPA: 3.78

EXPERIENCE

Software Engineer

Glenair, Inc.

June 2026 – Present

Anaheim, CA

- Migrating legacy systems into full-stack web apps to modernize and increase efficiency of engineering pipelines

Software Engineer Intern

Glenair, Inc.

May 2025 – Aug 2025, Jan 2026 – May 2026

Anaheim, CA

- Engineered a full-stack web app used to generate ZPL templates, supporting production of **600+ labels/week**
- Optimized API endpoints by integrating MinIO buckets with MSSQL Server, reducing file retrieval latency by **40%**
- Developed an on-premise server telemetry monitoring tool, integrating an MS Teams Webhook for instant alerts
- Automated integration testing across multiple APIs via **PyTest**, increasing data reliability by approximately **20%**

PROJECTS

Cohosted | *CI/CD, Terraform, Docker, AWS (API Gateway, ECR, Lambda, RDS, DynamoDB, S3, Cognito, Bedrock)*

- Designed and deployed a serverless **microservices architecture** across 5 independent AWS Lambda functions
- Provisioned all **infrastructure as code** with Terraform and automated testing and deployment via GitHub Actions
- Integrated an AI planning assistant using Amazon Bedrock, with live RDS and DynamoDB **context injection**
- Implemented email notifications via SNS and EventBridge Scheduler for per-user timed reminders through SES

March Madness | *FastAPI, PostgreSQL, Clerk, React, Tanstack*

- Kickstarted development for a 5-day DSA coding challenge for **15+ teams**, resulting in **150+ problem attempts**
- Integrated Clerk Authentication via GitHub OAuth 2.0 to secure sensitive API routes and manage user sessions
- Managed the full deployment pipeline using Vercel and Cloudflare to ensure high availability during the live event

fastfastapi | *Go, CLI, Docker, pypi*

- Built a CLI tool that scaffolds production-ready FastAPI projects, reducing initial setup time by up to **90%**
- Designed a modular generation system letting users compose only the integrations they need. PostgreSQL with SQLAlchemy, SQLModel, or FastCRUD; MongoDB via PyMongo; Redis caching; and OIDC authentication

Realease | *AI/ML, React, FastAPI, SQL, Clerk*

- Built the backend infrastructure for an AI-powered real estate platform, integrating live Zillow market data via RapidAPI and connecting it to a team-built XGBoost valuation and Monte Carlo risk simulation pipeline
- Designed a PostgreSQL schema to enable the LLM chatbot to reference each user's history across sessions

LEADERSHIP

Club President | *Association for Computing Machinery (ACM)*

May 2025 – May 2026

- Led the largest tech student organization at CSUF with over **2,500 members** and **55 officers** across 10 branches
- Supported ACM's community growth by serving as the Marketing Team Lead, a GameDev Officer, and Node Buds Big, managing social media presence, leading Unity workshops, and mentoring new members

Hackathon Director | *FullyHacks 2026*

June 2025 – April 2026

- Co-directed CSUF's largest hackathon, led planning and execution for **200+ participants** across **15+ universities**
- Led **30+ event organizers** across **5 teams** to design the event theme and branding, build the event website and application portal, secure and manage **\$10,000+** in sponsorships, and direct logistics through bi-weekly meetings

TECHNICAL SKILLS

Languages: Python, TypeScript/JavaScript, SQL, C/C++, C#, Java, Kotlin, Golang, HTML/CSS

Frameworks/Libraries: FastAPI, Flask, React, Tailwind CSS, SQLAlchemy, Pydantic, Alembic, Axios, Tanstack Query, Clerk

Cloud/DevOps: AWS (Lambda, API Gateway, S3, ECR, Cognito, EC2, Bedrock), Docker, Terraform, GitHub Actions, GCP

Databases/Tools: AWS (RDS, DynamoDB), Microsoft SQL Server, Neon, MongoDB, Firebase, Git, Postman, Figma, PyTest
